

Martensen IP Law Assists Taber Innovation Group in Securing Canadian Patent

by Martensen IP | May 4, 2022 | News, Patents

Company's Personnel (First Responder) Location and Monitoring System granted Patent No. 3107547

Colorado Springs, CO — Martensen IP Law (www.martensenip.com), a leading Colorado intellectual property law firm, has announced that client Taber Innovation Group has been granted a patent (No. 3107547) for its Personnel (First Responder) Location and Monitoring System by the Canadian Patent Office.

"Taber Innovation Group's first responder tracking system is an example of the creative problem-solving that makes the company a leader in its space," said Martensen IP Law Founder and Principal Mike Martensen. "The system enables users to reliably locate and monitor the well-being of first responders within buildings, including underground structures and environments in which traditional communication and data transfer mechanisms fail. A host of patents and pending applications in the United States, Canada and Europe will continue to expand and strengthen Taber's IP portfolio and protect its valuable assets."

The grant by the Canadian Patent Office follows the grant of U.S. Patent 11054529, validating the company's novel approach to intelligently locating first responders in austere conditions. The company also has an exclusive license of U.S. Patent 9699621 with ResponderX, Inc.

About Martensen IP Law

Based in Colorado Springs, CO, and operating at the intersection of business, law and technology, Martensen IP Law provides legal solutions to companies and investors worldwide that are facing

complicated intellectual property (IP) issues.
